2. REGULATIONS (Continued)

2.6 Make-Ready Requirements

2.6.1 Pole Attachment

(A) When an application for attachment to a pole is submitted by an attachee, a prelicense survey will be required to determine the existing adequacy of the pole to accommodate attachee's communications facilities. The Telephone Company will advise the Attachee in writing of the estimated charges that will apply for such prelicense survey and receive written authorization from the attachee before undertaking any portion of the prelicense survey. Attachee must prepay the cost of the survey or provide other reasonable security or assurance of credit worthiness before the Telephone Company will conduct a survey. Attachee shall be responsible for the costs of surveys made by the Telephone Company to review the application even if Attachee decides not to go forward with the attachments.

(N)

(B) The field inspection portion of the prelicense survey, which requires the visual inspection of existing poles may be performed by the Telephone Company or attachee (with optional participation by joint user and/or attachee). The administrative processing portion of the prelicense survey, which includes the processing of the application, the preparation of the make-ready work orders, the coordination of work requirements and schedules with joint users and other attachees, and the random field verification of field inspection results data developed and furnished to the Telephone Company by the attachee, will be performed by the Telephone Company. If the Telephone Company conducts the survey, it will allow New Attachee and any existing Attachees on the affected poles to be present for any field inspection conducted by the Telephone Company and will use commercially reasonable efforts to provide the affected Attachees with advance notice of not less than five (5) business days of any field inspection as part of the survey, and shall provide the date, time and location of the inspection, and name of the contractor, if any, performing the inspection.

2.6.1 Pole Attachment (Continued)

- (1) When the attachee performs the field inspection portion of prelicense survey, the field inspection results data will be furnished to the Telephone Company in a format specified by the Telephone Company and according to standards of accuracy and completeness satisfactory to the Telephone Company. In view of the Telephone Company's common carrier obligations to maintain safe and adequate service, the Telephone Company retains the right to do the field inspection portion of the prelicense survey again if in the sole judgment of the Telephone Company the data furnished by the attachee does not comply with the performance standards as prescribed by the Telephone Company. The attachee shall pay the Telephone Company for the total expense incurred by the Telephone Company to redo the field inspection.
- (C) The Telephone Company shall grant authorization for attachment to a pole of any size required by attachee when the Telephone Company reasonably determines that attachment space on such pole is available or can be made available (D)and that the pole may reasonably be rearranged or replaced to accommodate attachee's communications facilities.
- (D) In the event the Telephone Company determines that a pole to which attachee desires to attach is inadequate or otherwise needs rearrangement of the existing facilities thereon to accommodate the attachee's communications facilities, the Telephone Company will advise the attachee in writing of the estimated make-ready charges that will apply.

Company reserves the right to withdraw an outstanding make ready estimate beginning fourteen (14) days after the estimate is presented. New Attachee may not accept a make ready estimate after it is withdrawn.

(D)

If New Attachee accepts a make ready estimate before it is withdrawn, Telephone Company shall provide notice to all known entities with existing attachments that could be affected by the make ready in accordance with 807 KAR 5:015 Section 4(4).

- (E) Make-ready work will be performed following receipt of the required advance payment by the Telephone Company. Attachee shall pay the Telephone Company for all make-ready work completed in accordance with the provisions of this tariff and shall also make arrangements with the owners of other facilities attached to such poles regarding reimbursement for any expense incurred by them in transferring or rearranging their facilities to make such attachment accommodations available. Attachee shall not be entitled to reimbursement of any amounts paid to the Telephone Company for rearrangement of facilities on a pole by reason of the use by the Telephone Company, joint user, governmental entity or other authorized users of any additional capacity resulting from such replacement or rearrangement.

2.6.1 Pole Attachment (Continued)

(F) Should the Telephone Company, joint user or a governmental entity with pole attachment rights need, for its own service requirements, to attach additional facilities to any pole to which attachee is attached, attachee will either rearrange its communications facilities on the pole or transfer them to a replacement pole as determined by the Telephone Company so that the additional facilities of the Telephone Company, joint user or governmental entity may be attached. The cost of such rearrangement and/or transfer will be at the sole expense of the attachee. If attachee does not rearrange or transfer its communications facilities within (30) days after the receipt of written notice from the Telephone Company requesting such rearrangement or transfer, the Telephone Company or joint user may perform or have performed such rearrangement or transfer without liability on the part of the Telephone Company or joint user and the attachee shall be liable for the full costs thereof, except in the event that the Telephone Company negligence causes injury to person, damage to property, interruption of service, or interference of service.

(G) Whenever it is necessary for the Telephone Company to replace a pole to accommodate attachee's communications facilities, the Telephone Company will grant attachee the option, where possible and acceptable to joint user, to become the owner of the pole upon payment of all replacement costs on a fully installed basis. This option is subject to the further conditions that:
